

Engineer first...

then controlled execution

Looking for expert guidance throughout the life cycle of your company's mining project?

Do you need access to multi-disciplinary engineering services?

Leave it in the hands of Ukwazi's project development & delivery (PDD) specialists.

Ukwazi's PDD division is led by Albert Jacobs, an experienced professional engineer, with a track record of growing engineering and project management groups, and with a commitment to client collaboration.

Let us partner with you every step of the way, from concept through to project execution; drawing on our cutting-edge design solutions and project systems.

Our dynamic team utilises the latest engineering, procurement and construction management or bespoke contracting models and strategies, when designing and implementing mining related infrastructure, for surface and underground mining or process plants.

**We do mining... from
project development
to project delivery**

UKWAZI
project development & delivery

WHO IS UKWAZI?

UKWAZI IS AN ESTABLISHED SUPPLIER OF BOUTIQUE ENGINEERING SERVICES IN AFRICA

*Our expert teams are
there to engineer your
project's success*

We leverage technology and industry insight and expertise to drive commercial success and sector development.

Ukwazi Mining offers independent advisory, technical systems integration and operational contract mining services to a range of clients, across multiple markets and geographies.

As mining solutions architects, Ukwazi also has specialist capability in project development, mining, engineering, mineral processing, environmental sciences, rehabilitation and closure planning, for optimal efficiency, cost-saving and risk management.

WHAT MAKES US DIFFERENT?

Our clients have access to a full range of technical and management capabilities, all in one dedicated team, committed to:

ALIGNING INTERESTS

Adding value at each project stage

ACTIVE ENGAGEMENT

From concept to handover, and beyond

QUALITY OVER QUANTITY

Be it people, systems or solutions

OPTIMISING DESIGN

Advanced tools to create innovative solutions

MEETING OBJECTIVES

Managing delivery cooperatively & transparently

CUSTOMISING SOLUTIONS

Fit for purpose answers to your unique problems

EFFICIENT CONTROLS

Measuring and controlling change, cost, schedule and progress

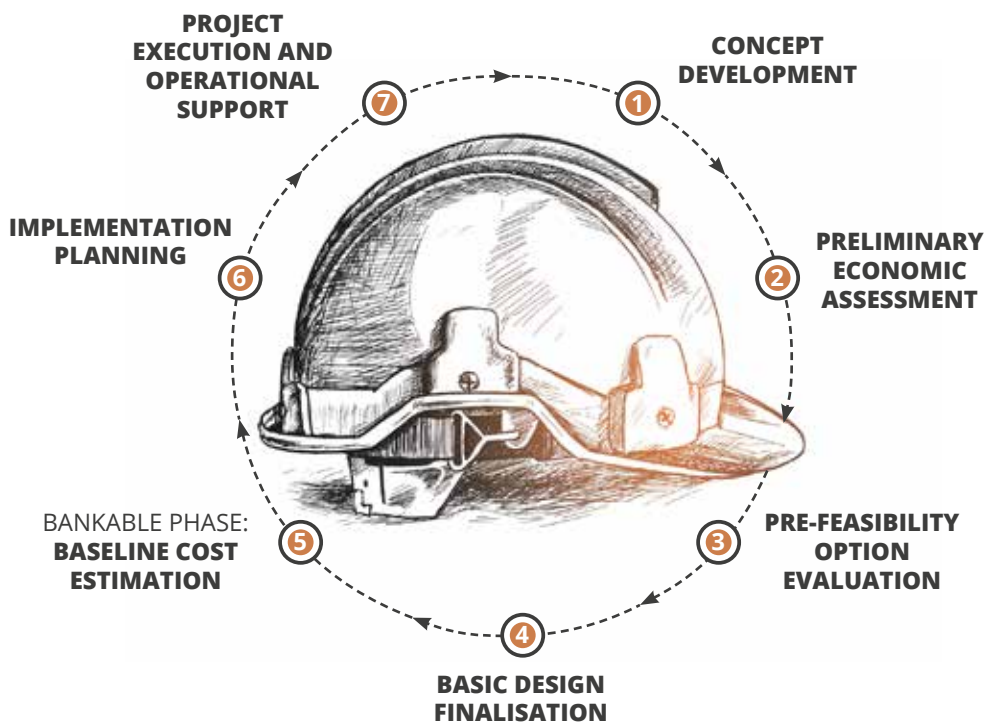

CURRENT TECHNOLOGY

Awareness of latest industry thinking and trends

OUR APPROACH

We design and engineer the preferred technical solution first, ensuring that it is executable, and then integrate tested project management systems and processes to guide implementation: all while keeping the bigger picture in mind. Best practice specialist tools, software and dashboards, including 3D to advanced BIM modeling, are then utilised to address project challenges, costs, quality management, and the integrated coordination of all key disciplines.

Our skilled miners and engineers are able to provide industry leading advice and hands-on implementation at every project touchpoint:

OUR GOAL?

TO ASSIST YOU IN

ACHIEVING

ALL PROJECT

REQUIREMENTS & OBJECTIVES

WHAT WE OFFER

Need an integrated and compliant engineering solution?

Our comprehensive, full-circle PDD service offering focuses on:

PROJECT MANAGEMENT SERVICES

Project management personnel and standards
Risk and change management
Project implementation models

ENGINEERING DESIGN SERVICES

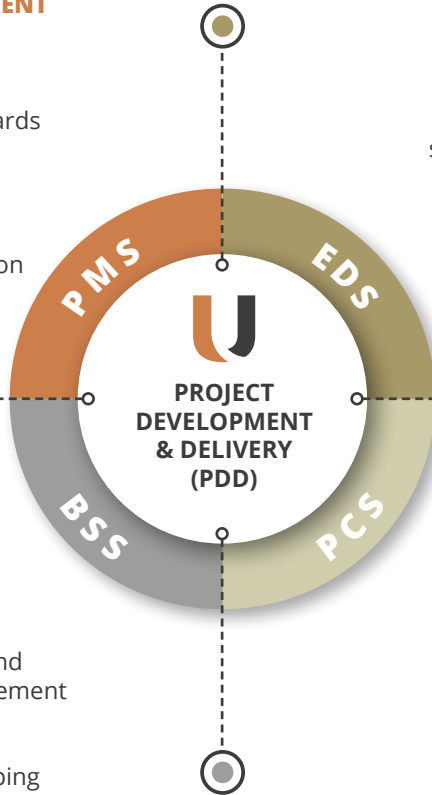

Multi-disciplinary engineering design, standards and procedures
Specialist design services
Construction and commissioning support

BESPOKE SOLUTION SERVICES

IoT enabled device implementation
Remote monitoring and computerised management
Scanning, reality capture and GIS mapping

PROJECT CONTROL SERVICES

Required control, expert personnel
Logistics management
Project control standards, procedures, systems and software
